Not sure since when since they did not post the tables I sent with previous messages. I will change that process from here on out if that is what is now going to happen.

Matt,

I'm working in the AC Data Management unit now and I just want to let you know that Terry is working with PIOs and posting the data exactly how you guys send it up the chain. If you check the <http://www2.epa.gov/goldkingmine/data-gold-king-mine-response> website you can see how the data is being posted. But with our new procedures including this template we will get the data flow process squared away.

Thanks

Dan

I have no problem with how the data gets posted, I thought those tables were going straight from Data/Scribe to either UC or HQ, the tables we have were never supposed to be posted. We sent them along with our message for the UC to see as a courtesy

Matt/Jon

We have been working with HQ in a streamlined approach for data transmission from the regions to UAC to HQ then ultimate data posting to the web.

We are all in favor of this new format because it will allow us to have a better handle of what is posted to the site and maintain data integrity.

Are you all ok with this? If there are reports that you need that are regionally specific for your use we can do that but we need to standardize how we submit data to HQ.

**Subject:** Data Template

All. Here is our proposed template for data transmission. This is very similar to Scribe deliverables. It allows us here in the EU to sort data for better review and verification process. The template I am attaching has one row of Example results for visualization.

Please review and let me know if this is going to be acceptable by the Regional community and PI. There have been some data posted on the web using this format.

Thanks

Terry
